

WIDE-EYE™

POLYP TRAP

Efficiently retrieving resected polyps

Simple installation, unparalleled vision and quick collection means the Wide-Eye™ is the most efficient way to retrieve resected polyps.

- ✓ Easy in-line installation
- ✓ Unobstructed vision
- ✓ Magnification
- ✓ Quick polyp retrieval

FEATURES & BENEFITS

- ✔

Easy in-line installation
Installs in just seconds to minimise loss of suction.
- ✔

Unobstructed vision
Unique design allows an unobstructed view.
- ✔

Simple polyp retrieval
Just pull the lid tab and retrieve the polyp.
- ✔

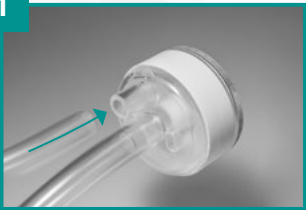

Quick polyp detection
The white receptacle gives a contrast to help differentiate polyp from effluent.
- ✔

Magnification
The inbuilt magnifying lens enables the smallest polyps to be identified quickly.
- ✔

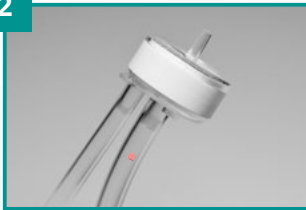

Cost effective
Simple and secure polyp retrieval at a cost effective price.

HOW TO USE THE WIDE-EYE™ POLYPTRAP

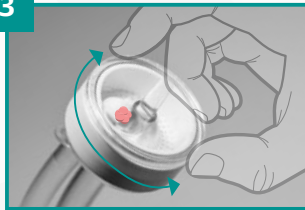

- 1**

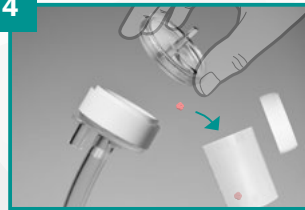

Connect the suction tube from the endoscope's suction barb to the Wide-Eye™ outflow port.
- 2**

Connect the Wide-Eye™ tubing back to the endoscope's suction barb. You are now ready to capture excised polyps.
- 3**

Once the polyp is captured in the chamber and has been inspected using the magnifier, disconnect the Wide-Eye™.
- 4**

Remove the lid, take out the polyp and place in a formalin pot. Rinse the trap and replace the lid ready to reuse with the same patient.

CAT. NO.	DESCRIPTION	UNITS/BOX
APT013	Wide-Eye™ Single Chamber	25

Wide-Eye™ Polyptrap is an individually packed, single use device. For detailed instructions please refer to the IFU on our website. Wide-Eye - Reference: G003001A
